COPICOH-NEWS DECEMBER 2019

Dear interested in networked health,

the year 2019 will come to an end with the traditional December Newsletter and we are delighted to be able to present such an important topic at the end of the year: the PASBADIA project.

We hope you enjoy reading it.

We are looking forward to many more exciting contacts in 2019 and wish you a reflective festive season and a healthy transition into the New Year!

Prof. Dr.-Ing. Andreas Schrader

ACTIVATE at the BMBF networking meeting

The final meeting of the BMBF funding projects Human-Technology Interaction (MTI) took place in Berlin on December 12 under the motto "Innovations in intensive care and palliative care" as part of the high-tech strategy of the German government. [continue reading](#)

Master students conquer the COPICOH Health Lab

On 10.12., the students visited the Health Lab in the first semester of the new Master of Health Sciences as part of the lecture Introduction to Digital Health Care. The topic was to get to know and try out developments of IMIS and ITM in the field of digital health. [continue reading](#)

The DISH Consortium meets in Liverpool

For the 3rd consortium meeting of the Erasmus Plus project "DISH - Digital & Innovation Skills Helix in Health" all involved EU partners met in Liverpool in the second week of December 2019. [continue reading](#)

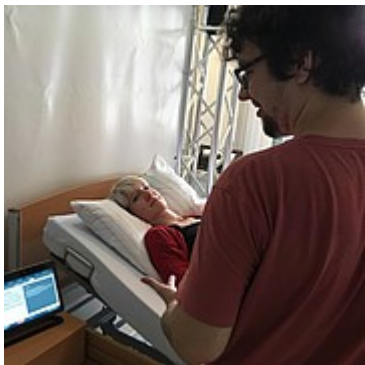

National research project MOMENTUM connects rescue service and clinic

MOMENTUM stands for "Mobile medical technology for integrated emergency care and accident medicine". The project is implemented by the Institute for Medical Electrical Engineering of the University of Lübeck, the UKSH, the Universities of Bremen and Leipzig as well as numerous partners from industry. [continue reading](#)

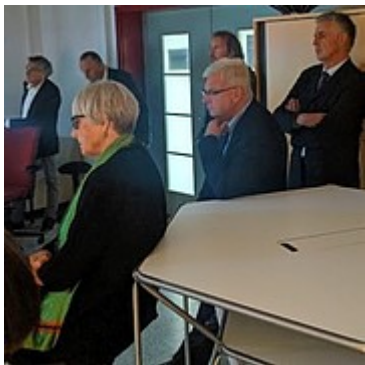

New project PASBADIA launched

The Joachim Herz Foundation is supporting PASBADIA, a joint project at the interface of engineering sciences and medical care at the Technical University of Lübeck and the University of Lübeck, with around 1.3 million euros with the aim of optimising ophthalmological care in rural areas. [continue reading](#)

Second test of the digital support system in wound care

On October 23 and 24, the Ambient Care Team conducted a second test of the digital wound care support system. The so-called Wound Care Assistant supports nurses in the care process, for example by voice control with integrated documentation of all relevant information and now also wireless foot switches. [continue reading](#)

Foundation Board of Trustees met at COPICOH

The Foundation Board of Trustees of the University of Lübeck held its meeting on October 17, 2019 at the Institute for Telematics. Together with our President Prof. Gabriele Gillessen-Kaesbach the full concentration of the participants was placed on the Health Lab and the projects running there. [continue reading](#)

Publications

During the year, scientists of COPICOH again were able to publish numerous publications in high-quality journals and peer review conferences. [continue reading](#)
